Warning: You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

TYPE: Mutual Fund. INTERNATIONAL EQUITIES. This fund complies with Directive 2009/65/EC. **TERM:** This fund may not be suitable for investors who plan to withdraw their money in less than 10 years. **OBJECTIVES:** Invest 50-100% of total exposure (usually more than 75%) in equities of any sector and the remainder in public/private fixed income (including deposits and listed or unlisted, liquid money market instruments). Exposure to currency risk will be 0-100%.

Fundamental analysis techniques are used to select equities, seeking companies in mature growth stages with stable profit margins that, in the manager's opinion, are undervalued and have revaluation potential. The manager believes that these companies are resilient as they have proven business models and stable earnings, qualities that could help, in the event of generalized market declines, to keep their price from falling as much as that companies in younger growth stages with unstable earnings. We will invest primarily in large-cap companies, with a maximum of 25% in mid- and/or small-cap companies.

Fixed-income issues will have at least medium credit quality (minimum rating BBB-) or, if lower, the rating of the Kingdom of Spain at any given time. For unrated issues, the issuer's rating will be taken into account. The average duration of the fixed-income portfolio is not predetermined.

Issuers/markets will be OECD or emerging, without limit. There may be geographic/sector concentration.

It may invest up to 10% of its assets in financial CIS (eligible assets), whether harmonized or not, from the Management Company's group or not.

More than 35% of the assets may be invested in securities issued or guaranteed by an EU State, an Autonomous Community, a Local Entity, International Organizations of which Spain is a member and States with solvency no less than that of Spain.

The CII diversifies investments in the assets mentioned above in at least six different issues. The investment in securities of the same issue does not exceed 30% of the assets of the CII.

Derivatives traded on organized derivatives markets for hedging and investment purposes and derivatives not traded on organized derivatives markets for hedging and investment purposes may be traded. These operations involve risks due to the possibility that the hedging may not be perfect, the leverage involved and the lack of a clearing house. The maximum degree of exposure to market risk through derivative financial instruments is the amount of net worth.

It seeks to obtain an adequate return in relation to the risk of the assets in which it invests. The fund is not managed with reference to any index (the fund is active).

TARGET RETAIL INVESTOR: The fund's target audience is mainly retail investors, although it is aimed at all types of investors.

What risks do I run and what could I get in ?

RISK INDICATOR

Lower risk

Higher risk

This risk indicator assumes that you will hold the product for 10 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely the product is to lose money due to market developments. We have classified this product in risk class 4 on a scale of 7, where 4 means medium risk. This assessment rates the possibility of suffering losses in future returns as medium. This product does not include any protection against future market performance, you could lose some or all of your investment. Other risks of significant importance not included in the summary risk indicator are liquidity risk, due to the possible investment in fixed income of low credit quality or in small capitalization equities, sustainability risk and exchange rate risk, due to investment in currencies other than the euro.

PROFITABILITY SCENARIOS

What you get from this product will depend on future market performance, which is uncertain and cannot be accurately predicted. The unfavorable, moderate and favorable scenarios shown are illustrations based on the lowest, average and highest returns of an appropriate benchmark over the past 10 years. Markets could evolve very differently in the future.

Recommended maintenance period: 10 years				
Example of investment: 10,000 EUR				
Scenario		In case of departure :		
		1 year	5 years	10 years
Minimum	There is no guaranteed minimum return. You could lose part or all of your investment.			
Voltage	What you could receive after deducting the costs	3.444 €	3.580 €	2.154 €
	Average yield per year	-65,56%	-18,57%	-14,23%
Unfavorable	What you could receive after deducting the costs	7.893 €	10.097 €	19.540 €
	Average yield per year	-21,07%	0,19%	6,93%
Moderate	What you could receive after deducting the costs	10.979 €	14.961 €	20.587 €
	Average yield per year	9,79%	8,39%	7,49%
Favorable	What you could receive after deducting the costs	14.746 €	16.784 €	21.147 €
	Average yield per year	47,46%	10,92%	8,08%

The figures presented include all costs for the product , but may not include all costs you may have to pay to your consultant or distributor. The figures do not take into account your personal tax situation, which may also influence the amount you receive. The return on this product will depend on future market developments, which are not known in advance and cannot be predicted exactly. The unfavorable, moderate and favorable scenarios have been based on the lowest, average and highest performance of the product and its benchmark over the last 10 years. Markets could evolve very differently in the future. The stress scenario shows what you could receive in extreme market circumstances. This type of scenario was produced for an investment of 10,000EUR between 2014 and 2024.

What happens if Rolnik Capital Owners, SGIIC, .A. cannot pay?

In the event of a possible insolvency of Rolnik Capital Owners, SGIIC, S.A., it would not affect the assets invested in the product, since it is a CII in which the unit-holders invest and not in the management company. The fluctuation of the price of the underlying assets in which the CII invests will determine the possibility of non-payment of the investment. There is no compensation or guarantee system to protect the retail investor.

What are the costs?

The person advising you on this product or selling it to you may charge you additional costs. In such a case, he or she will provide you with information about these costs and the impact they have on your investment.

COSTS OVER TIME: The tables show the amounts that are deducted from your investment to cover different types of costs. These amounts depend on how much you invest and how long you maintain the product. The amounts shown here illustrate an example of investing a certain amount over different possible investment periods. We have made the following assumptions:

- In the first year, you would recover the amount invested (0% annual return). For the other maintenance periods, we have assumed that the product evolves as shown in the moderate scenario.
- 10,000 EUR are invested annually.

Investment of EUR 10,000			
Scenario	In case of departure :		
	1 year	5 years	10 years
Total costs	201 €	1.005 €	2.010 €
Annual incidence of costs (*)	2,01%	2,01%	2,01%

(*) Reflects the extent to which costs reduce your return each year over the maintenance period. For example, it shows that, in the event of an exit at the end of the recommended maintenance period, the average expected return each year will be 9.50% before deducting costs and 7.49% after deducting costs.

COMPOSITION OF COSTS
